SUMMARY

Senior Flutter developer with **5+ years** building secure, high-traffic mobile apps for FinTech, health, hospitality and e-commerce. I lead teams, set clean-architecture foundations and ship reliably through CI/CD, delivering apps with **99% uptime**. As founder of Feemag, I also build and run my own products end to end: an AI character platform, an exact-size photo compressor and 33 privacy-first browser tools.

SKILLS

Mobile	Flutter, Dart, FlutterFlow, BLoC, Provider, Clean Architecture, MVVM, DDD, SOLID
Backend & data	Firebase (Auth, Firestore, Cloud Functions), Supabase, REST APIs, WebSockets, SQL, SQLite
Integrations	Stripe, RevenueCat, In-App Purchase, Google Maps & Places, Auth0, Deep Links, Web3
Web & AI	React, Next.js, TypeScript, Tailwind CSS, LLM APIs (OpenRouter, Groq), streaming AI chat
Delivery	Git, GitHub, Bitbucket, CI/CD, Docker, integration testing, App Store & Google Play releases
Cloud	AWS, UpCloud, Vercel, Google Cloud (Firebase)

EXPERIENCE

Flutter Developer · Mentorbits

May 2022 – Present

- Lead a team of **6 developers across 6 major projects**; mentoring and code reviews raised code quality by **40%**.
- Built CI/CD pipelines with custom Docker images, cutting app delivery time by **25%**.
- Reduced post-launch bugs by **20%** through code reviews and streamlined workflows.
- Raised team productivity by **25%** with training sessions on Flutter tooling and domain-driven design.
- Integrated Stripe, the Google Maps API, Web3 and deep links into production apps.
- Delivered **90%** of projects on time, working with clients to align technical solutions with business goals.

Founder · Feemag

2026 – Present

Independent product studio: I design, build, launch and run each product myself.

- **Persona** (persona.feemag.com): an AI character chat and creator platform built with Flutter, Next.js, Firebase and TypeScript Cloud Functions, featuring real-time streaming replies, persistent memory, moderation, and subscriptions through RevenueCat (mobile) and Stripe (web).
- **ExactKB** (exactkb.feemag.com): compresses photos to an exact KB or MB limit for job portals, visa forms and exam uploads, entirely on the user's device.
- **Feemag Tools** (tools.feemag.com): 33 free image, PDF and spreadsheet tools that run fully in the browser with WebAssembly: no uploads, no accounts.

SELECTED CLIENT PROJECTS

Dr. Adem · Health support app for cancer patients

- Built a full-featured app for patients, caregivers and healthcare providers: secure real-time chat over WebSockets, appointment scheduling, dosage tracking and symptom logging.
- Added secure upload of health documents and test results, activity tracking, wellness check-ins, and a unified Life Monitor dashboard, with a focus on privacy and accessibility.

Holedo · Hospitality career & networking platform (holedo.com)

- Developed the job portal, real-time chat, company pages and user profiles on REST APIs and Firebase (push notifications, Firestore).
- Managed Google Play and App Store releases; worked with backend and cross-functional teams on reviews and improvements.

FitX · AI pose estimation & squat analysis app

- Integrated AI-based pose estimation for in-depth squat analysis from user videos, and led a full rebrand.
- Improved performance and upload reliability (with retries), added local notifications, and secured sign-in with Auth0 (client-credentials flow) and social logins.

Web: Seen Beauty Salon (bilingual English/Arabic booking site, Riyadh) and Choco Haven (bake-shop menu and online ordering).

EDUCATION

BS Software Engineering · COMSATS University Islamabad

Mar 2017 – Jan 2021 · CGPA 3.62 / 4.0

ACHIEVEMENTS

Certificate of Appreciation · Mentorbits

May 2025 · For exceptional dedication and timely, successful project delivery
